DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claim 48 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim 48 claims an invention in which the wireless interface in a mobile station initiates a request to the base station regarding frequency bands and protocols. However, the specification describes only that the base station queries mobile station for such information, and not the other way around. Claim 48 also claims that the mobile station selects the frequency band and the communication protocol. However, throughout the description in the specification, it is the base station that is doing the selection and not the mobile. It is clearly that Claim 48 contains subject matter which is not described in the specification, hence Claim 48 is rejected.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 48 recites the limitation "the subscribing unit" in the last phrase. There is insufficient antecedent basis for this limitation in the claim. Hence, Claim 48 is rejected.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claim 48 is rejected under 35 U.S.C. 102(b) as being anticipated by Blakeney, II et al. (U.S. Patent 5,638,412).

Regarding Claim 48, Blakeney teaches a mobile station comprising: a case; an antenna coupled to the case (Fig.1, the mobile station); a wireless interface (Fig.2, Service Negotiator 20) disposed within the case and coupled to the antenna that facilitates communication with the at

least one base station to receive a broadcast message from the base station, the broadcast message indicating the plurality of frequency bands and the plurality of communication protocols (Col.5, Line 65 to Col.6, Line 2); the wireless interface also facilitating transmission of a request to the base station based upon contents of the broadcast message, the request requesting additional information regarding one of the plurality of frequency bands or one of the plurality of communication protocols supported by the base station (Col.6, Lines 11-17); the mobile station selecting a frequency band from the plurality of frequency bands within which to operate; the mobile station selecting a communication protocol from the plurality of communication protocols within which to operate; and the subscribing unit communicating with the base station within the selected frequency band and according to the selected communication protocol (Col.16, Lines 22-27, and Co.16, Lines 56-58, the mobile station determines the service configuration).

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Mayrand et al. (U.S. patent 5,504,939) teaches the selection of communication channels.
